

Applicant: Charles C. Freeny, Jr.
Title: **MASTER OPERATING SOFTWARE SYSTEM**

What is claimed:

1. A split personal computer system for selectively processing video portions, input/output portions, computational portions and storage portions of personal computer tasks, comprising:

a remote portion adapted to selectively perform the computational portions and the storage portions of the personal computer tasks, the remote portion having a master operating software system stored thereon;

a local portion adapted to selectively perform the video portions and the input/output portions of the personal computer tasks, the local portion comprising:

a display unit located remotely from the remote portion of the split personal computer system;

an accessory unit in communication with the display unit;

an input unit in communication with the accessory unit to input data signals into the accessory unit;

communication means for interfacing the accessory unit with the remote portion of the split personal computer system for permitting data signals received by the accessory unit from the input unit to be transmittable from the accessory unit to the remote portion of the split personal
